BUILDING & CONSTRUCTION TRADES APPRENTICESHIP PROGRAMS

World-class Apprenticeship Programs

The Building Trades' world-class apprenticeship and training infrastructure is the pride of the American labor movement, providing a great and comprehensive way for a worker to acquire the experience and instruction to establish a career without the burden of debt. Apprentices earn a living wage throughout the education process, with periodic raises to reflect increased experience and training.

Apprenticeship programs are a unique type of education, combining on-the-job training with traditional classroom instruction. These skills have historically been handed down from one skilled craftsman to the next, ensuring that integrity, a strong work ethic, and pride carry on from generation to generation. With the opportunity to learn from the construction industry's most highly trained instructors in a safe environment, apprentices graduate with a portable, recognized credential affording them good pay and benefits to support themselves and their families.

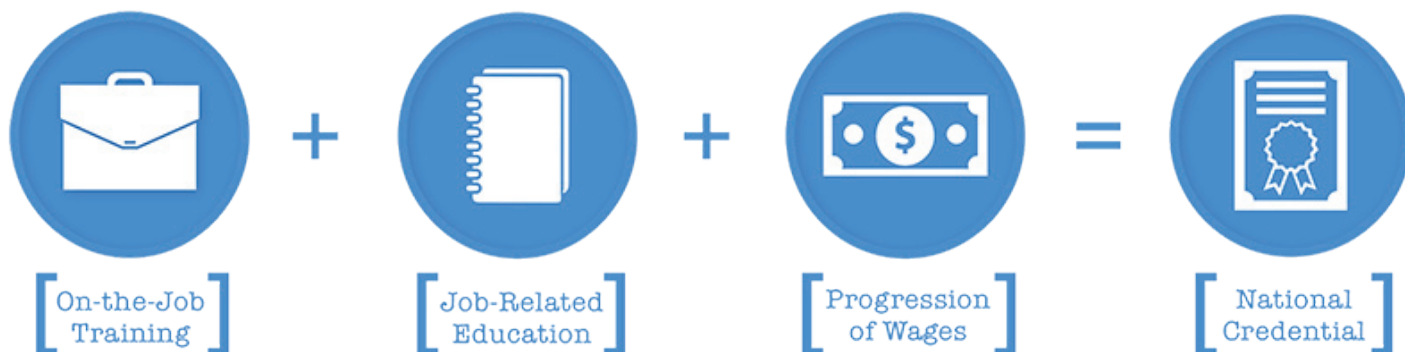

For more information about Building Trades apprenticeships, visit North America's Building Trades Unions website at www.NABTU.org.

Apprenticeships and Equal Opportunity

Apprenticeships are privately funded through a partnership with trades unions and union contractors and are overseen by the United States Department of Labor via the National Apprenticeship Program. The Office of Apprenticeship (OA) is responsible for providing service to existing apprenticeship programs and technical assistance to organizations who would like to establish an apprenticeship program. Applicants and apprentices are assured of proper selection and training by the regulations recognized by OA.

Apprenticeship programs will not discriminate against apprenticeship applicants or apprentices based on race, color, religion, national origin, sex (including pregnancy and gender identity), sexual orientation, generic information, or because they are an individual with a disability or a person 40 years old or older. The programs will take affirmative action to provide equal opportunity in apprenticeship and will operate the apprenticeship program as required under Title 29 of the Code of Federal Regulations, part 30.

Apprenticeships provide equal employment opportunity: Women and minorities are encouraged to apply. To be selected, you must meet the qualifications of the particular trade and program to which you are applying and follow the registered selection process.

WAGES & COMPENSATION

Building Trades Unions' world-class apprenticeship programs train workers to become highly-skilled, six-figure earning construction workers through a debt-free, technologically-advanced education. These earn-as-you-learn programs pay family-sustaining wages and provide health care coverage and retirement benefits from day one.

Construction registered apprenticeship programs provide years of the best construction training in the business, equipping local workers with top-notch trade skills for fulfilling lifelong middle class careers in the building trades. Once the apprenticeship program is completed - Journeyman and can expect the following wages:

BOILERMAKERS

The Boilermakers work includes repairing, fabricating and assembling, boilers, tanks vats, pressure vessels, heat exchanges and similar vessels made of metal plate. Boilermakers assemble and erect prefabricated parts and fitting at construction sites where the boilers or other pressure vessels are to be used after installation is completed, and make all necessary tests to check for defects. They also do repair work in the field. A variety of tools are used at times when assembling and erecting steel plate units at a building construction site.

BRICKLAYERS

Whether a Bricklayer works with brick, concrete blocks, structural tile or other masonry materials, the work is essentially the same. Bricklayers construct walls, partitions, fireplaces, chimneys and other structures from brick. They also use other masonry materials, such as concrete, cinder, or gypsum block; precast panels made of brick, cement, tile, stone, marble, structural tile, to terra cotta. They also install the brick linings of industrial kilns and furnaces.

BRICKLAYERS #8

HOW TO APPLY

Applicants should contact Training Director Shane Garrison, sgarrison@bac8IL.com or call 618-401-9960 for an appointment.

Bricklayers #8
3301 Boardwalk Drive
Champaign, IL 61822

Appenticeship Information

- Applicant must be 18 years of age or older
- Provide copy of birth certificate
- Provide copy of Driver's License
- Provide copy of High School diploma or GED certificate
- Permanent resident in a county represented by the Union
- Non-refundable application fee of \$20.00 is due with the application

CARPENTERS / MILLWRIGHTS

The trade of carpentry includes many phases of the construction industry, e.g. milling, fashioning, joining, assembling, erecting, fastening, or dismantling of all structural materials. The handling, cleaning, erecting, installing and dismantling of machinery, equipment and materials are all phases of the millwright area of carpentry. Carpenters in some cases specialize in one particular phase of the trade such as the installation of acoustical materials, driving pile, making cabinets, laying wood and resilient floor, laying carpet, or working in sawmills. Carpenters use blueprints and specifications to determine types of material and sizes to be used on the jobs.
